1. Introduction

Keyword Harvester is a simple and effective keyword research tool. With Keyword Harvester you will be able to quickly build and export keyword lists. Follow these simple instructions to begin.

2. Installation

Double click the installer and follow the online instructions to install Keyword Harvester.

3. Usage

Below is a screenshot of the Keyword Harvester interface:

The screenshot displays the Keyword Harvester application window. At the top, there is a text input field labeled "Enter the Keyword or Phrase to Search for:". Below this field are two checkboxes: "Ignore Results Over 5 Words Long" and "Sort Results Alphabetically When Complete", both of which are checked. To the right of these checkboxes, the copyright notice "Copyright (C) 2003-2006 Xybercode, Inc. All Rights Reserved" is visible. Below the checkboxes are three buttons: "Search", "Reset", and "Save Results to Text File". At the bottom of the window is a table with two columns: "Searches" and "Keyword". The table is currently empty.

Searches	Keyword
----------	---------

To begin enter a keyword to search for. Hit the Search button to begin the search.

3.1 Other Options

By default the Sort Results Alphabetically When Complete button is checked. You may uncheck this if you wish.

Ignore Results Over 5 Words Long is also checked by default. It is usually a good idea to leave this checked. However, you may uncheck this if you wish.

Saving your keywords is very easy to do. Click the Save Results to Text File button to do this. You will be prompted to name the file and designate the location.

To clear the search results and/or search term you can press the Reset button.

I hope you enjoy Keyword Harvester!
